

What is claimed is :

1. An anticorrosive lubricant composition for molded plastic products, containing 100 parts by weight of a synthetic hydrocarbon oil having kinematic viscosity of 10 to 500 mm² / s at 40°C, and 0.1 to 10 parts by weight of a corrosion prevention additive.

2. An anticorrosive lubricant composition for molded plastic products according to claim 1, wherein said synthetic hydrocarbon oil is poly α - olefin.

SUB
A₁ > 3. An anticorrosive lubricant composition for molded plastic products according to claim 1 or claim 2, wherein said poly α - olefin is a mixture of one kind or not less than two kinds, selected from the group of oligomers of decene - 1 such as a dimer, trimer, tetramer, and so forth, of decene - 1.

4. An anticorrosive lubricant composition for molded plastic products according to any one of claims 1 to 3, wherein said corrosion prevention additive is a sulfonate based anticorrosive.

5. An anticorrosive lubricant composition for molded plastic products according to any one of claims 1 to 4, wherein said sulfonate based anticorrosive is one kind or not less than two kinds, selected from the group consisting of Li - sulfonate,

Ba - sulfonate, Ca - sulfonate, and Zn - sulfonate.

6. Molded plastic products to which said anticorrosive lubricant composition for molded plastic products according to any one of claims 1 to 5 is applied, and which is composed of one kind of resin, or not less than two kinds of resins, selected from the group consisting of polycarbonate resins, ABS resins, polystyrene resins, and polycarbonate - ABS resins.

7. Molded plastic products according to claim 6, wherein said molded plastic products are mechanical components including gears, and shafts.
